

Resident/Clinical Fellow Name _____

**VSIR- Integrated Vascular Surgery Residency, R1
Competencies,**

Michael S. Conte, MD, Program Director

Competencies define procedures or activities that the resident/clinical fellow can usually perform without on-site supervision: Patient management, including H&Ps and diagnostic and therapeutic treatments, procedures and interventions encompassing the areas described below and similar activities. The underlying patient condition and complexity of the procedure or activity might dictate the need for direct supervision and physical presence of the attending physician. Whenever a question arises about resident/clinical fellow competency to perform a procedure independently, the attending physician should be consulted.

With regard to informed consent, if the procedure or treatment is one that a resident or fellow has demonstrated and documented competency to perform, as determined by their Program Director, then the resident or fellow may have the informed consent discussion with the patient or their surrogate decision maker. Otherwise, it is the responsibility of the attending physician, or other credentialed healthcare provider, who is knowledgeable about the specific surgery, procedure, or treatment, to have an informed consent discussion with the patient or their surrogate decision maker.

R1 First Year Integrated Vascular Surgery Resident

Airway management, stable/unstable, trauma: Adult
Anesthesia - local: Adult/Pediatrics
Anesthesia - field block: Adult/Pediatrics
Ankle-brachial index: Adult/Pediatrics
Arterial line -insert and remove: Adult
Bladder irrigation: Adult
Blood gases (arterial): Adult
Cardiopulmonary resuscitation - closed: Adult
Cast/splint (apply and remove) - for immobilization/protection: Adult
Chest tube -remove: Adult/Pediatrics
Compartment pressure measurement: Adult
Cricothyroidotomy, emergency: Adult
Cultures (urine/sputum/wound): Adult/Pediatrics
Cutdown - venous - remove: Adult/Pediatrics
Cutdown - arterial - remove: Adult/Pediatrics
Defibrillation: Adult
Doppler study - venous: Adult/Pediatrics
Doppler study - arterial: Adult/Pediatrics
Doppler study - graft/fistula: Adult/Pediatrics
Drainage tube (fluid/blood pus - not chest or mediastinal) - remove: Adult/Pediatrics
Drug administration - intravenous: Adult/Pediatrics
Endotracheal suctioning: Adult
Foley catheter - insert and remove: Adult
Gastric lavage: Adult/Pediatrics

Incision and drainage, abscess/fluid collection/cyst: Adult/Pediatrics
Laceration repair: Adult
Long intestinal tube - insert and remove: Adult
Lumbar puncture: Adult
Mediastinal tube - remove: Adult
Nasal packing - anterior: Adult
NG tube - insert and remove: Adult/Pediatrics
Other wound care - not debridement (change/replace dressing; clean): Adult/Pediatrics
Pacemaker/pacer wires, transthoracic - remove: Adult
Pacemaker/pacer wires, transvenous - remove: Adult
Perform/interpret lab tests (spin Hct/do, UA/EKG/gram stain/peripheral smear/etc.): Adult/Pediatrics
Peritoneal lavage: Adult
Phlebotomy - including blood cultures: Adult/Pediatrics
Pulmonary artery catheter - remove: Adult
Rectal tube -insert and remove: Adult/Pediatrics
Remove foreign body: Adult
Sigmoidoscopy/anoscopy - with biopsy: Adult
Sigmoidoscopy/anoscopy - without biopsy: Adult
Sutures/staples - insert and remove: Adult/Pediatrics
Wound debridement: Adult/Pediatrics
